

## Three year strategy (2024-2027)

### WSV Presidency

What can we offer in three years? What do we want to achieve and share by the summer of 2027?

**General ideas and concrete actions, always engaging/involving the SG, all Committees and WSV members (and collaborating with other related groups) and integrating all topics/lines of interests, without losing a common and workable focus**

## I. Public awareness: WSV webpage sustainability and use in coordination with social media

1. Transition towards a sustainable webpage helping the objectives of the WSV

2. Ensuring the payment of new members and renewals, WSV members who can find their membership worth it beyond the participation in the ISV

## II. Support to practice

- Practice guides
- Trainings

1. Working on or supporting practice guides on the principles of justice/rights/treatment of victims and have them in **open access in various languages**

4. Always in collaboration, designing and sharing training for practitioners/researchers/policy makers/activists

## III. Policy making

Engaging with diverse stakeholders who are all important (although more or less visible) in policy making

1. Diverse territorial scales: international, national and local regulations, programmes, strategies, actions in Africa, America, Antarctica, Asia, Australia/Oceania

2. A broad notion of victimisation in relation to justice, public health, peace, safety, security, welfare and economy, public services...

## IV. Debate/networking

Physical and virtual online event(s) with activists/practioners/researchers/policy makers (in different countries and languages).

1. Attending and organising online and life events (always with the horizon of the next ISV) to share with different stakeholders, grassroot organisations and the public

2. Developing cooperation with other groups working in the field, understood in a broad sense

3. Going beyond the Global North and beyond the classical frontiers of victimology

4. Collaboration with cultural events (exhibitions, etcetera)
